

HOW CAN INDUSTRY HELP TO PROTECT WATER BODIES?

Permits

- Do you have the correct permits? Chapter 170 of the Town code explains what kinds of development and redevelopment require permits.

Cover Up

- Secure dumpsters properly so that trash doesn't fly out.
- Secure drums so that chemicals don't leak into the Town's drainage system.

Landscape Care

- Lawns only need one inch of water per week.
- Limit the use of fertilizer; excess nutrients like fertilizer are what turn Lake Quannapowitt green in the summer.

Spill Prevention

- Have a plan in place if a spill happens.
- Use drip pans to catch any spills and dispose waste properly.
- Use kitty litter or sand to dry up a spill instead of washing it down a catch basin.
